## (54) KIT FOR ASSAYING SACCHARIFIED HEMOGLOBIN

## (57)Abstract:

PROBLEM TO BE SOLVED: To provide a new method for assaying saccharified hemoglobin and fructosylvaline which is a degraded product thereof.

SOLUTION: This method for assaying fructosylvaline is characterized in that a fructosylvaline oxidase acts on the fructosylvaline under one of the following conditions (a) to (c): (a) the reaction solution having pH  $\leq 6$ ; (b) the reaction solution having  $\geq 200$  mM electrolyte concentration; and (c) the combination of the conditions (a) and (b).

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
